SCIENCE PERFECTING SWIMMING. - F Barnett, of Paris, has patented a novel, yet simple apparatus for swimmers. The invention consists in supplying to man by art the apparatus which has been given to the frog by nature. For the hand, he has a large, membranous fin, which is held to its place by loops pass-ing over the fingers and a strap around the wrist. The surface presented to the water by these fins is so large as to add greatly to the effectiveness of the strokes of the arm, but not so large as to exhaust the muscular power. Their effect is to very much reduce the effort usually re-naired in swimming. But the greatest ingenuity is displayed in the form and fitness of the fins for the legs, which are attached to the ankles, and are so formed that they act upon the water in the movement of bringing forward the legs, as well as in throwing them back. They act so finely in "treading water," swimmers call it, that one can really walk, if not on the water, at least in it. The difference between swimming with

this apparatus and without it, is very much like the diff-rence between rowing a boa; with a handle and the blade of an our. The old swimmer has no trouble in using the fins at first trial, and is surprised to find with what strength he can swim without exhaustion. He easily swims twice as fast with the apparatus as without it, and with it he can sustain himself for hours upon the water, and swim many miles.—Scientific American.

BLACK EYES .- Take a little dry starch, or arrow root, and merely moisten it with cold water, and lay it on the injured part. This must be done immediately, so as to prevent the action of the air non the skin. However, it may be effectually applied some hours after. How ment is not always at hand, and some children have an insurmountable repugnance to baving it applied. These oplications are, however, of uncertain eve but bathing in hot water, which is often very tedious; but if immediately amplied this is a sure remedy or pre-

A Vermont farmer was startled while hoeing corn, recently, by seeing a rhi-towers coming towards him, plowing a farrow like a stead ploy with his horn. The farmer, who relies on the Tribune for his agricultural knowledge, at first took it for a pote-school of the new style, but the arrival of a party of showmen ! search of the insect explained flungs.

Twenty-three men on the New York Control train refused to deliver their tekets until they were furnished seats. The conductor tried every expedient. including vacant seats in another car, where prices were higher, but finally had to succumb.

Railway enterprise has met with great been opened with celat, and rapid traveling his proved so congenial to Japanese taste that three additional trains per day have been added to the original time table.

A beau' fal and accomplished young lely no sed Henderson, from Saginaw, Michigan, was arrested at Simcoe, Onta-rio, recently, for stealing a horse. Auother and prior indiscretion led to the act, and she was dressed in men's clothing at the time.

During the months of July and August been 2,125,000 centals, of which 1,503,-400 have been exported. Since the 1st of July 47 cargoes have been shipped to Europe and one to Australia.

COME, SEE, AND BE SATISFIED.

ROOFING! THE UNDERSIGNED IS PREPARED TO furnish the people of Eastern Nevada with Asbestos, Tin & Felt Roofing

SAM'L. D. TILLMAN, Cor. Sec'y.

This roofing is particularly adapted to mills and furnaces, as it is acid proof, and does not sweat or rust.

Also Asbestos roof paint and cement.

Canvus roofs made perfectly water-tight, by Asbestos Cement.

Also, Asbestos roof paint, to be used on Asbestos, tin or shingles; and Asbestos Cement for bad leaks, rust or nail holes in tin before painting.

TIN ROOFING done up in neat bundles of 100 feet, in sheets 10 feet in length, sent with proper directions to any part of Eastern Nevada. Also, common felt for sheds and other cheap, flat-roofed buildings. Send exact measurment of building over all, and all roofs will be guaranteed to fit.

White Fine county.
